

INDUSTRIES

Hospitality & Restaurants

The hospitality industry is an intensely competitive landscape with unique and challenging legal issues that require a wealth of knowledge, experience and resources to successfully navigate.

We cover businesses from restaurants, bars, spas, golf courses and country clubs to travel agencies, hotels, resorts and convention centers. Our lawyers understand the factors impacting our clients, and many have previously served as employees of hospitality industry companies. This experience allows us a keen perspective on market standards and unique issues that arise for our clients. We help define key business goals, assemble the right legal team and develop strategies to optimize the client's objectives. We have represented lenders, investors, joint ventures, operating partners, franchisors and franchisees. We know the players and their expectations. We consult with clients regularly on issues in the context of their business goals and opportunities.
