

# Peculiar Patents: Lunar New Year

AUTHOR: DONALD R. HAGEMAN, III

Lion dances are often performed at houses or businesses to bring in prosperity for the new year. The figure of a lion represents power and wisdom, and the lion itself is believed to be an optimistic animal. The lion dance is usually accompanied by clashing cymbals and a band, which creates a festive atmosphere for the onlookers.

Lion dances are usually performed by troupes. However, this invention negates the need for human performers.

Patent [CN105538319A](#) was invented for those who are looking for an automated lion dance troupe. This invention uses motors, levers, and ropes to power the ceremonial lion dance.
